PROJECTS

1. E-Commerce Game Website

Overview:

- Designed and developed a web-based platform for users to download their desired games with ease and efficiency.
- Implemented a user-friendly interface and an efficient download process.
- Integrated real-time download progress tracking and pause/resume functionality.
- Used HTML, CSS, PHP, JavaScript, and Bootstrap to build the platform.

GitHub 🔗

2. Chatting-App

- Chatting App project, built with Next.js 13, React, Socket.io, Prisma, Tailwind CSS, and MySQL.
- Features real-time communication capabilities through Socket.io for an immersive user experience.
- Boasts a sleek and dynamic user interface crafted with the versatility of Tailwind CSS.
- Employs Prisma and MySQL for robust database management, ensuring seamless functionality.
- Showcases the power of Next.js 13 in enhancing the overall performance and efficiency of the application
